## CARE SHEET FOR BATHTUBS, TILE, COUNTERS

Due to the non-porous surface of the finish, there is no need to use abrasive cleansers on a newly refinished surface. Any household liquid detergent will give excellent results.

### Instructions For Your Newly Refinished Surface:

1. DO NOT use the surface for the specified number of days or hours indicated by the refinisher who completed the job.
2. DO NOT lay soap or bottles or any objects on the finish at any time!
3. DO NOT let a leaky faucet go un-repaired.
4. DO NOT use abrasive cleansers. No S-O-S Pads. No Comet. No Soft Scrub.
5. DO NOT use loose bath mats with suction underneath. Ask about our bathmats for refinished surfaces.
6. DO NOT pick surface dust off with your finger. Any surface dust will dissipate in 3-4 weeks with normal cleaning and usage.
7. The best way to keep your tub clean is to wipe it down with a towel after each use. You don't have to wipe it dry.
8. Maintain caulking around the tub.
9. Here are some good cleansers to use:
  - Lysol Basin and Tile Cleaner
  - Mr. Clean
  - DOW
  - Fantasic
10. Wax tubs once every 4 months with a urethane polish (Turtle Wax 2001) You should polish your bathtub five days after it has been refinished.
